A mock-up shop to purchase yarn.   Link to project repo

Sun Run (React, Rest API)
An app to search the times for sunrise and sunset in order to schedule your jogs.

Link to project repo

PERSONAL PROFILE

I am a web-developer and graduate from Juno College of Technology. This time last year, I worked as a Childcare Specialist when my desire for professional growth led me to an online web development class. I discovered that it was the challenge I had been seeking. Now, with expertise in frontend development I am looking to land my first job in the technology sector.

EDUCATIONAL HISTORY

Juno College of Technology
 September 2020 - March 2021
- Immersive Bootcamp | January 2021 - March 2021
- Juno is a Private Career College that runs nine-week full-time bootcamps to train web developers on the most up-to-date skills, including HTML5, CSS3, responsive design, JavaScript, jQuery, APIs and React.
- Javascript | October 2020
- Web-Development | September 2020

Concordia University
BFA Contemporary Dance | September 2008 - 2012

WORK EXPERIENCE

Frontend Developer
Jean Lumb Foundation | December 2020
- Implement accessibility standards with descriptive alt tags.
- With resourcefulness and communication I used Wordpress successfully.

Childcare Specialist
Self-Empoyed | July 2016 - May 2020
- Successfully implemented behavioural protocols to reduce child's harmful self-injurious behaviour through quick problem-solving
- Led a program to improve child's sleep and educate the team of childcare providers and parents on an effective sleep schedule with management and communication skills
- Collaborated with a team of medical professionals to improve child's speech delays through team work.

Professional Server
Byblos Restaurant Downtown| November 2014 - March 2016
- Provided high-quality service with interpersonal skills and ability to multitask under pressure.
- Increased revenue by knowing the product and clients needs.
- Increased regular clientele by creating a welcoming and memorable experience for customers..
